

## Errata for Hazy 06.02

*The line label for O 3 5007 is wrong on page 431 of Part 3 of Hazy.* The last sample program in section 3.9 of Part 3 retrieves the intensity of [O III] 5007 with a call to `cdLine`. In the example there is only a single space between the O and 3 in "O 3". There should be two spaces. Also the `!` before `cdLine` is incorrect, it should be removed. The block starting 13 lines before the end should read as

```
if(cdLine( "o  3" , 5007 , &rel , &absol ) <=0 )
{
    printf("could not find 5007\n");
    exit(1);
}
```
